

# PRELIMINARY ANALYSIS & CONSULTATION REPORT FOR FRESHWATER AND TERRESTRIAL HABITAT PROPOSALS

## **SUMMARY OF RESPONSES RECEIVED**

This document shows which individual/organisations have responded by 22 May 2006 to the 'Consultation Report on the proposals for the BAP Priority Habitat Series'.

Any queries should be addressed to Ed Mountford, JNCC Habitats Advice Team (email to [ed.mountford@jncc.gov.uk](mailto:ed.mountford@jncc.gov.uk)).

# = indicates which habitats an organisation/individual commented on

Organisation/individual	General points/generic issues	Freshwater habitat proposals - new priority types - general	Active Shingle Rivers	Headwaters	Oligotrophic lakes	Ponds	Other river types	Canals	Mountain heaths	Upland flushes and fens	Upland natural rock and scree habitats	Rock outcrops, mine spoil and river shingle rich in heavy metals	Post-industrial sites	Traditional orchards	Field banks	Roadside verges	Waxcap grasslands	Scrub and treeline vegetation	Ancient and/or species-rich hedgerows	Cereal field margins/Arable land	Lowland wood pasture and parkland	Lowland calcareous grassland	Lowland heathland	Native woodland
