If the action is regarded as significant (please see guidance) indicate this in the box and provide further details in Table B. For actions not regarded as significant simply state if the action is ongoing or complete. Remember any action which is being dropped from the workplan will be regarded as significant for the first round of reporting.

Brief text description justifying assessment of status: (~ no more than 100 words for each country/region)							
<p>No new systematic survey has been carried out. EN funds for an invertebrate survey of Thorne & Hatfield Moors, which had been offered by the Team Leader (Humber-Pennines) for 2000-01 appear not in fact to be available.</p>							

Field 5: Summary statement

Please provide an overview of plan implementation, including new factors affecting the species or habitat which will accelerate or constrain progress towards meeting of the targets. Where a factor results in new action(s) please cross-reference back to the relevant numbers under Field 3 and Table B.

Nothing new to report. The most significant immediate adverse factor affecting the species, which was removed from the Action Plan between drafting and publication, is believed to be flooding of the species' microhabitats due to the local raising of water levels as part of English Nature's conservation management of Thorne Moors. This requires monitoring and modification and is covered in the existing targets and actions. It is assumed, with little evidence to date, that the species will be able to track its microhabitats as these move around the sites as the area gradually becomes wetter.
